

I'm sending this e-mail in regards to NAB's petition 04-160. Why should they be able to dictate what I listen to in regards to a service I pay for ??? Don't we have national security issues to worry about rather than wasting time arguing over what channel I get my weather & traffic from ?? What a colossal waste of tax payers money. Next you'll want to dictate what channels I watch at home ?!?!? XM radio is a service that I PAY for and NAB has no business dictating what I can listen to on that Pay service. Perhaps if the average radio station played more than 20 minutes of music per hour, they wouldn't feel threatened....
